Profile

Computer Science graduate (BSc Hons, 2:1) currently working in hands-on technical support: diagnosing and repairing hardware and software faults and explaining solutions clearly to customers. Solid foundation in Windows, macOS, Microsoft 365, Active Directory and TCP/IP networking (DNS, DHCP), plus the development skills to build support tools, including a complete IT ticketing system. Looking for an IT Support or Helpdesk role in a team where I can keep growing towards systems administration. Fluent in Portuguese and English.

Experience

Technical Support Technician, iServices (device repair specialist) – Leiria, Portugal Jun 2025 – Present

- Diagnose and repair smartphones, tablets and MacBooks, identifying hardware and software faults and carrying out repairs such as screen, battery and connector replacements.
- Reset, format and prepare devices, and troubleshoot software, operating system and connectivity issues.
- Assess reported faults, choose the right fix and explain technical issues and repair options clearly to customers.
- Work in a fast-paced, customer-facing environment, balancing diagnosis, repair deadlines and customer needs.

IT Support Intern, Dayton Progress – Nazaré, Portugal Apr 2019 – Jul 2019

- Provided first-line support for hardware and software issues, helping users with day-to-day problems and workstation maintenance.
- Prepared and configured computers, workstations and peripherals, including operating system setup and software installation.
- Gained practical exposure to Active Directory, user profiles, corporate email accounts, access controls and server-based systems, and assisted with improvements to production software and internal IT processes.

Projects

HelpDesk Pro: IT service desk application · github.com/FPires99/helpdesk-pro 2026

- Built a complete ticketing system for IT support teams: ticket lifecycle, priority-based target times (SLA) with overdue alerts, internal notes, activity history, attachments and email notifications.
- Added a knowledge base that suggests fixes while users type, reports on resolution time, SLA performance and satisfaction, and CSV export.
- Implemented role-based access and admin user management, including a leaver process (account deactivation, open tickets returned to the queue).
- *Laravel, PHP, SQL, Tailwind CSS, REST API · 97 automated tests running on GitHub Actions*

Final-year project: Next.js vs Laravel 2024

- Built the same complete web application twice, with Next.js (React) and with Laravel (PHP), and compared them on architecture, performance and maintainability.

Education

Leeds Beckett University (UK), BSc (Hons) Computer Science, Upper Second Class (2:1) Sep 2021 – Jun 2024

- Operating Systems, Computer Networks, Databases, Software Development and Computer Systems.

Externato Dom Fuas Roupinho, Técnico de Informática – Sistemas (vocational diploma) Sep 2017 – Jun 2020

- Computer systems, operating systems, networking and programming.

Technical Skills

IT Support: Hardware & software troubleshooting, device repair, Windows, macOS, Microsoft 365, user support, ticketing systems, remote support

Systems & Networking: Active Directory, user accounts & access management, TCP/IP, DNS, DHCP, network troubleshooting

Development: PHP (Laravel), JavaScript, React, SQL, Java, C/C++, Git & GitHub

Languages: Portuguese (native), English (fluent; studied and lived in the UK)
